Volume 148

Q. Zheng, Note on the non-homogeneous Prendiville process 1
O. De Feo, S. Rinaldi, Singular homoclinic bifurcations in tritrophic food chains 7
M.J. Chappel, R.N. Gunn, A procedure for generating locally identifiable reparameterisations of unidentifiable non-linear systems by the similiarity transformation approach 21
P. Lenas, N.A. Thomopoulos, D.V. Vayenas, S. Pavlou, Oscillations of two competing microbial populations in configurations of two interconnected chemostats 43
P. Auger, D. Pontier, Fast game theory coupled to slow population dynamics: the case of domestic cat populations 65
M. Kretzschmar, K. Dietz, The effect of pair formation and variable infectivity on the spread of an infection without recovery 83
A.J. Baczkowski, D.N. Joanes, G.M. Shamia, Range of validity of α and β for a generalized diversity index $H(\alpha, \beta)$ due to Good 115
F.B. Hanson, D. Ryan, Optimal harvesting with both population and price dynamics 129
Z. Lu, K.P. Hadeler, Model of plasmid-bearing, plasmid-free competition in the chemostat with nutrient recycling and an inhibitor 147
T. Philipson, W.H. Dow, Infectious disease transmission and infection-dependent matching 161
A. Kopp-Schneider, C. Portier, P. Bannasch, A model for hepatocarcinogenesis treating phenotypical changes in focal hepatocellular lesions as epigenetic events 181
Y. Zhou, Unique wave front for dendritic spines with Nagumo dynamics 205
